JOSUE ISAI SALAZAR CASTRO

Full Stack Developer · Flutter · Applied AI

La Piedad, Michoacán, México joshi.jc2032@gmail.com Cell 352 188 7541

Focus on taking artificial intelligence from a fine-tuned model to the tool the team uses, across the whole system: database, backend, and interface.

Tech Stack & Tools

CORE Flutter/Dart, Supabase, C#, MySQL, SAP BTP/HANA, Gemma 4 12B (QLoRA), Qwen.	**WORKING KNOWLEDGE** Angular, TypeScript, React, Vue, Java, Spring Boot, Node, PHP.
CLOUD Firebase, AWS, Docker, Git.	**BACKEND** NestJS, Prisma, PostgreSQL, REST API
TOOLS GitHub, GPS, n8n, MCP.	**SOFT SKILLS** Problem-solving, teamwork, adaptability.

Professional Experience

AI Engineer · PM — Aug 2025 – Present

AI agents (LLM) for industrial processes and enterprise platforms, with embeddings.

3D Assembly, Quotation & Drawings Agent — Gemma 4 12B + Qwen

- Gemma 4 12B, fine-tuned with QLoRA, builds the 3D assembly from real parts and picks the layout that best uses the warehouse.
- The Qwen model, specialized in reading drawings, produces the racks, the estimated quote, and the drawing already fitted with the racks.
- A rendering engine produces the 3D render from the warehouse dimensions, constraints, and installation conditions.
- The time to prepare that response fell from 40–80 working hours (1–2 weeks at 8 h/day) to 10 minutes: a time saving of 99.6%–99.8% was achieved.

Department-based enterprise platform — Flutter + Supabase

- Modules organized by department; as a whole, it works as an ERP.
- Kanban with board, Gantt, and calendar views, and planned vs. actual dates on every task.

Full Stack Developer (Freelance) — Dec 2025 – Present

Custom software for restaurants and administrative operations.

Restaurant Management System — Flutter + Supabase

- Zapata, Sushi Lim, and Casa Lim apps built and migrated in Flutter + Supabase (database, auth, storage, and realtime).

Web Platform & Admin Control (MAXIFUM) — Flutter + GPS + AI

- Internal control system with roles, tasks, GPS location, and AI validation of photo evidence.
- Desktop app for real-time staff monitoring.

Intern · Mitsubishi Electric Automotive de México — Aug 2025 – Dec 2025

Digitization of Kaizen improvement proposals at the plant.

- C# UI modules with proposal history and forms that follow workflow status.
- Centralized module: filtering, PDF export, and role-based multi-step approval.
- Module migration to Angular, with validation and testing for the cutover.

Intern · Enjo-it — Sep 2023 – Feb 2025

Business process automation and approvals in the cloud.

- Email approval workflows in SAP BTP Cockpit: each request followed business rules and, once approved, was stored in SAP HANA.
- Operational data migration to the cloud with SAP BTP, joining storage, requests, and approvals in one flow.

Education & Languages

B.S. in Information and Communication Technologies
National Technological Institute of Mexico, La Piedad Campus
University · 2021 – Present · Expected graduation: Jan–Feb 2027

Associate Degree in Computer Science
Technical High School, Conalep · Aug 2018 – Jun 2021

LANGUAGES
Spanish: Native · English: B1
